

# custom portraits for modern families

Gwendolyn Waite is a portrait photographer who works exclusively on location in the Twin Cities, using only natural light. Specializing in newborns, children, and teens, Gwendolyn's photo shoots are fun, individualized experiences designed to create custom family photos that capture the charm and personality of your loved ones.

## The Cherished Arrival Birth Day Photography

Your child's birth is an unforgettable occasion. But trying to photograph the experience can be a tall order for new parents. Birth Day Documentation begins with a personal consultation prior to your due date that helps acquaint me with your needs and answer any questions. Then, whether at a hospital, birth center or in your own home, I provide unlimited coverage of labor and delivery, unobtrusively and quietly capturing moments from this extraordinary event. Because I can only schedule a limited number of these sessions per month, please contact me as soon as possible to reserve your space.

## The Newborn, Naturally In-Home Portraiture

Photographs of your newborn's first days are ones you will prize for a lifetime. Whether you want custom-designed albums or unique portraits to display on your walls, I will work to capture the distinct beauty of your little one in a setting that is authentic and meaningful – your home. Beginning with a consultation prior to the actual session, In-Home Portraitures are a relaxed, comfortable experience, using only natural light and allowing plenty of time for nursing and diaper changes. I particularly enjoy capturing the budding relationships between tiny babies and their new family members, so brothers, sisters, moms and dads are all encouraged to participate. Because newborns change and grow by the hour, I recommend these sessions be taken within the first 10 days of life.
